The Komodo Dragon

Michael. K Level 3 Lavender Class Teacher: Cory 課程類別:自然課 老師簡稱

Have you ever wondered about the Komodo Dragon? How big is a Komodo Dragon? What does it eat and why do they even call it a Komodo Dragon? In this essay I will tell you the answers.

The Komodo Dragon is three hundred cm long and the longest can get up to four hundred cm long, that' s longer than' s car! The Komodo dragon likes to eat deer, wild boar and water buffalo but they are not picky and will eat whatever they find. It is called a Komodo Dragon because it lives on the small Komodo Islands of Indonesia. The Komodo Dragon lays about thirty eggs a year but only a few will hatch if they' re lucky. Their eggs are about the same shape and size of a goose egg. One of the most interesting things about a Komodo Dragon is its spit. It' s very dangerous because it has a lot of germs and disease and it is very toxic so it can kill its prey. Its spit is so powerful it can kill large animals and even people! The Komodo Dragon is the largest lizard in the world.

I hope you have found an interest in this subject like I have. Thank you for taking some time to read this and I hope you check out more about the Komodo Dragon.

No School for a Week

Hayley Level 2 Jasmine Class Teacher: Bryan 二樓茉莉花教室 老師簡稱

I had no school for a week there are so many things I would do. The first thing I' d do is I would go to see my cousins, aunt, uncle, grandfather and my grandfather because I miss them so much.

on Tuesday or if all go to the beach. We' ll spend the day laying on the sand and building sand castles. I would go swimming in the ocean and find shells on the beach.

Wednesday I' d go to the hospital. Hm, I worry it' s not because I' m sick, It' s because my other aunt had a baby. My family and I would go and look at my new born cousin. I know she' ll be the cutest baby in the hospital.

I wouldn ' t be able to wait for Thursday because that' s the day my other aunt and uncle would take me strawberry picking. They are the best aunt and uncle because no one else ever takes me strawberry picking.

Friday and Saturday I would go and see a movie on Friday. Mainly would call and ask me to go to a movie with her but I' d have to tell her I was going with Steven already.

Melody, being the great friend she is, would understand and call me later on.

That would be such a good week. It almost makes me realize that summer' s almost here. Well it looks like I know what I' ll be doing soon enough.

See you soon summer!

The Greatest Day of My Life

Ashley Level 4 Citrus Class Teacher: Cole 課程類別:自然課 老師簡稱

Last month, my family and I went to a huge museum. I was very happy. My father drove us to that museum. It was very big and beautiful. My mother bought the tickets for us and then we went in.

I saw a lot of fun things there. My father explained all of the things to the museum that were important to everyone' s lives. My mother took a lot of notes in the museum. We saw a lot of science movies. Some of the movies were about space and planets. Some of the movies were about famous scientists.

We went to see lunch when it was twelve o' clock. Then, we went to the other museum to look at paintings and statues. I saw a lot of beautiful paintings. Some of them looked very ugly. Some of them looked scary. Lots of them looked beautiful. I saw a lot of statues, too. Most of the statues looked like real humans. Other statues looked very, very strange. I couldn ' t tell if one of the statues was a cat or a horse. Another one looked like a mouse and an elephant. It was fun.

We went to a long store when we finished looking at beautiful paintings and strange statues. There were food, drinks and small shops on the street. We ate a lot of French Fries, fruit, juice, and a lot of food. My mother bought some souvenirs in the small shops. We saw a special shop on that street. All of the shops on that street sold accessories. Only one shop was different. It sold books. We went into the book store and read. I read three books in that store. One of the books that I read was Harry Potter. It was a great book, but I can ' t remember what it was talking about.

The second book was "The Series of Unfortunate Events — The Bad Beginning." It talked about the three Baudelaire parents and how they were killed by a terrible fire. A banker wanted Count Olaf to take care of them. Count Olaf was a bad man. He wanted to get the Baudelaire fortune.

The last book was Sherlock Holmes. Sherlock Holmes was a very, very, very smart detective. He solved a lot of mysteries. I think he was the greatest detective in the world.

We went to a beautiful park after we finished reading the books at the book store. The park was very big. A lot of people were playing in the beautiful park. There was a big playground in the middle of it. I saw that a lot of little children were playing on the playground. I saw some people playing basketball and some were running. It was a great park.

This day was the greatest day of my life. I loved it.

Dumplings

Kevin Level 3 Lavender Class Teacher: Cory 課程類別:自然課 老師簡稱

Have you ever wondered how many kinds of dumplings there are in the world? Or how to make different kinds of dumplings? What do different kinds of dumplings taste like? In this essay, I will answer all of these questions.

How many different dumplings are there in the world? There are so many different kinds of dumplings. There are fried dumplings, boiled dumplings, baked dumplings, meat dumplings, vegetable dumplings, cheese dumplings, and plain dumplings. Fried dumplings taste good. Boiled dumplings taste bad. Steamed dumplings taste better than boiled dumplings and baked dumplings. meat dumplings, vegetable dumplings, cheese dumplings and plain dumplings taste excellent. Lastly meat dumplings have no vegetables. meats, cheese, and plain. I like to eat the meat dumplings most. Dumplings are a very important food. If you want to make a good dumpling you need to make it carefully. You need to put good things inside like meat or vegetables. You need to make them big and they need to taste and smell good as well.

The making of dumplings was a very important event in human history. I hope you have found an interest in this subject like I have. Thank you for taking some time to read this and I hope you take some time to check out more about dumplings.

My Life as a Famous Person

Pola Level 2 Jasmine Class Teacher: Bryan 課程類別:英語 老師簡稱

I think that being famous would be really cool. I ' d like to be a basketball player like Michael Jordan, Kobe Bryant or Yao Ming. / If he was of the most talented players the NBA has ever seen and they would pay me lots of money.

One thing I ' d make sure to do is give back to the poor people in Africa. I feel bad that they don ' t have food, clothing, good homes and places where they can go to school. My mother told me that if I want to be truly happy then I need to give back to those who aren ' t as lucky as me.

I ' d also make sure that I looked after my family and friends. Of course I ' d make sure that I had enough money for myself but I wouldn ' t forget about the people that got me to where I am.

If I make sure that I got an education as well. That way when my basketball days were over I could become a famous doctor who could heal even the richest people in the world. I would want to help all the people in Taiwan that got into bad accident accidents. The coolest skills that ? possess would be able to neuromyon that come into the hospital.

Life as a famous person would be great as long as I used my power for good and not evil.

A Great Man or Woman

Helen Level 4 Sunflower Class Teacher: Ron 課程類別:自然課 老師簡稱

If you ask me, "Do you know who is really good ?" I ' ll answer you, "Thomas Alva Edison is the most professional person I ' ve ever seen" If you ask me why ? I have a good answer ! Thomas Alva Edison had invented lots of things in his life, and his went. I give my world he succeeds!

His friends said, "You ' re wasting your time for making this!" And he always said, "I ' m not wasting my time! I ' ve already know lots of things can ' t become anything ! " He was an intended inventor and he had also asked," Why does ? + ? = ?" to his teacher!

Thomas Alva Edison was still famous until today ! He invented the light so that we can see at night, he also invented the telephone so that we don ' t need to write letters anymore!

When Thomas Alva Edison invented the things we really need, everyone in his neighborhood was proud about him!

After he married, he was still inventing things! His wife had already tell him, " You ' re too tired! Take a rest, go travel to anywhere you want! "Thomas Alva Edison was happy! He said, " Okay! I ' ll go tomorrow!"

The next day, he went to his favorite place, his wife thought he went out, but after a few minutes, she knows he didn ' t go out! He was in his room and keep inventing new things. She was very disappointed! Thomas Alva Edison was happy! The wife was sooooo because Thomas Alva Edison ' s favorite place was the lab! She thought he had already gone on a trip!

Thomas Alva Edison was a really good person! He invented the important things in our life, then he invented telephones so we don ' t need to write letters and sent to the place we want! We really need to say " Thank you!" to Thomas Alva Edison! Because he was really good! If we didn ' t have he, we ' ll still need to write letters and we ' ll still trying to invent the lights!

Squirrels

Cristine Level 2 Sunflower Class Teacher: Ron 課程類別:自然課 老師簡稱

We can ' t see squirrels very often in Taiwan, but we can find them in height 2500m above. a forest in Asia, Mid-forms, broadleaf trees, and coniferous trees because they can adapt these places very well. Theirs bodies about 20 cm long, theirs legs about 30cm long down. They have brown belly, a pair of red nose, a pair of big front teeth. Their stomachs are red, theirs bodies are brown and swelling tails, about 18cm long, so we also call them "swelling squirrels". The back of theirs bodies are beige, and theirs limbs are maroon. Theirs movies about 18-21.59cm long, tails about 7-16.6 cm long, and their hinds legs about 4-6 cm long.Their scientific names are "Callosciurus erythraeus erlanti" .

They love to eat plants' seeds, grass, shoot, flowers, small insects and birds' eggs. Keeping food on their hands, but they forget where do they keep those food very often because they are very confused. Plants are their staple food, they eat nuts, flowers, and shoots, they eat insects, too. They eat worms, birds' eggs. They can eat fruits, bananas, papayas, apples, guavas, pine apples, sweet corns and add Vitamin E.

Taiwan' s squirrels sexually ranks most by themselves, not now many male birds and males die very often. Squirrels' nest a collection about 40-50 c mdia. It ' s real,squirrels usually born 3 or 4 babies at once. Squirrels are daytime ' s activists, when sun comes up, they will go out and start hunting food. They stay at noon. We can see squirrels are hunting food at the most, they use their noses can smell the bunch or ground and keep walking, when they come across the food that they like,just use theirs front paws to grab it up and carry in both hands. When they ' re eating food, sometimes theirs cat-looks are believed, sometimes when they are naughty, they ' ll swing on bench and eat!

In humans' opinion, when squirrels pursue theirs girlfriends are funny. Let ' s take Taiwan' s squirrels, when a male squirrels pursue female squirrel, always the female squirrel runs in the front, and back have many male squirrels fall into rank and chase the female squirrel. When the female squirrel stop her steps, male squirrels also stop their steps, too. Sometimes the male squirrels will take the opportunity and fight, the competition is very drastic. When every male squirrels knocks out the last one, the strongest one, will win the female squirrel' s heart and with she make a pair!

JULIA 青少年英語資優班

對 象:學齡英語4-10年以上、並有意願進入JULIA LANGUAGE INSTITUTE 就讀或有國內外TOEFL上班族二四學生。
上課時間:週五晚上8:00~10:00或週六早上9:00~12:00，每週5小時
上課內容:文法解構剖析、翻譯、小說、閱讀、演說、簡報練習、研究報告與論文寫、散文、詩詞、人文系列等。戶外參觀
開課日期:2006年6月2日
開課人數:每班人數限制在一~九人(下午2:30~5:30)
