Supplementary Statement

Model No.: FB300 GTX (Antistatic)

Model Name: Leather Fire-Fighter Boots

This is to certify that the above mentioned boots are manufactured by **YAKUPOĞLU TEKSTİL VE DERİ SANAYİ TİCARET A.Ş.** The boots comply with EN 15090-2012 standard. They are brand-new and conforms to the following specifications:

- a. The boots are CE certified and comply with EN ISO 15090:2012 F2A+HI3+SRC+CI+AN.
- b. Outer layer: made of heat resistant black leather with fire and water resistant treatment. Thickness of leather: 2.4mm and up. Height of boots: 30 cm and up (measured from outsole).
- c. Anti-impact design of comfort material at boot opening end and heel and ankle to increase the comfort of wearing and protection.
- d. Standard colour reflective tape of UL or EN marks on the sides.
- e. Gore-Tex Waterproof membrane (non woven PTFE) - special for fire fighting application to prevent liquid penetration. Indication tag for the membrane is attached with the boots.
- f. Outsole is designed with the features of anti-static, oil / slippery resistance, and anti-chemical treatment
- g. Steel toecap and steel insole are designed with puncture resistant protection, to prevent the sole poked by sharp articles
- h. Intergrated form from the outsole to the vamp -one piece molded outsole- to avoid water pernetration from the intergraded area
- i. Both sides pull straps on the upper.
- j. Boots thread is made of Kevlar® or similar characteristics to Kevlar®.
- k. Weight: less than 2.7 kgs (base on size No.42 in EN standard)
- l. Website: <http://www.yakupoglu.com.tr/>
