

銀色卡紙切割可固定項鍊刀膜

塑膠盒尺寸約10*16.5cm

紙盒尺寸約14*20.5cm

Why choose Vital-ion?

Science has long recognised the mood-boosting power of negative ions, which occur naturally when water evaporates. This may be why we feel so alive near waterfalls and beaches. Vital-ion products emulate these natural environments to produce ongoing flows of negative ions. The technology uses a natural catalyst made from mineral gemstones such as tourmaline and germanium. Vital-ion products continuously deliver this permanent life-enhancing stream of negative ions at concentrations unmatched by any other product.

The health benefits are?

Medical research has identified some specific symptoms related to excess positive ions - increased blood pressure/pulse rate, bone weakening, nervous tension, slowed recovery from illness, respiratory problems. More specifically, recent research has shown harmful impacts on arthritis, asthma, stroke, suppressed immune system function. Positive ion excesses have been connected with increased levels of stress hormone serotonin, and cancer-causing free radicals.
