

遊水

官田 烏山頭水庫

全臺唯一「半水成式工法」的烏山頭水庫提供多樣的親水設施，如水濺瀑布、噴灑雨林、兒童滑水梯、仿石洞隧道等，其中滑水道銜接造浪區，玩來十分過癮。而周邊水庫大壩、八田與一紀念園區及戀占石皆是可瞭解八田與一技師足跡的重要場域。

蟬鳴的盛夏燃燒大地，我只想躲在西拉雅的水之窟，打開所有感官，乘著沁涼微風，流連在名為第一的水庫間，或綠野開闊的農場，恣意迎向水的活潑繽紛與青春氣息……

新化 虎頭埤水庫

新化水庫擁有 160 餘年晨昏風華，雖是座老水庫，水上設施卻很現代，腳踏天鵝船、龍形船、獨一無二的太陽能船等，兼顧環保與水資源維護；也有開放式的釣魚、戲水道等付費遊憩，滿足不同玩樂需求。

Wusanto reservoir in Guantian township is the sole reservoir in Taiwan applied to the building technique called "Semi-hydraulic Fill Method" which also provides multiple water applied entertainment facilities, for instance "water curtain" waterfall, sprinkle rainforest, children slippery ladder and imitated rocky tunnel. One of the most recommended facilities is the water slippery hose linked to the artificial wave zone. In addition, the recognition to Mr. Yoichi Hatta's great contribution can be found through the visit to Mr. Yoichi Hate memorial park, dam area to water reservoir and "unwilling to leave" stoned ladder.
