

早知道 預警機

early warning predictor

earth quake gas leakage carbon monoxide fire and smoke hypnosis treatment sunrise lighting mobile phone is your control

地震發生 瓦斯外洩 一氧化碳 火災煙霧 催眠療癒 日出燈光 手機操控

Merry-Link (早知道) · 是世界第一款具有地震P波預警功能、瓦斯偵測、一氧化碳偵測、火災煙霧偵測、助眠療癒以及模擬日出LED燈光的多功能智慧產品。有了這些安全偵測功能，可以讓人睡得更安心，催眠療癒燈光可以幫助入睡而模擬日出自然喚醒的燈光功能，可以讓人愉快的起床，一整天精力充沛。

The Merry - Link (early warning) predictor is the very first smart device bearing multiple functions in the world

- it can detect wave P prior to the occurrence of earth quake
- it also can detect gas , carbon monoxide , fire and smoke
- it can help people with solution and improvement to their sleep disorder.
- it can simulate the natural sun light with LED light.

Possession of all these benefits and helps at once, people not only feel relax and secured, but also the hypnotic solution does improve the quality of sleep and the simulated natural light will wake people up naturally in a easy and pleasant way. As the result, people become dynamic all day long.

地震P波 預警

wave P from earthquake / early warning

The golden 8 seconds - prior to the occurrence of earthquake helps people to have the chance and extra time to reach a shelter urgently.

搶先 黃金8秒 緊急保護避難

依據調查，地震重大傷亡通常發生在半夜。當人熟睡時反應較為遲鈍，因此錯過避難時間，本產品使用高科技電子陀螺儀加速器偵測地震波，以距離震源60公里，可以爭取到8秒的避難時間，地震警報時，藍+白光會全亮，藍光可以讓大腦褪黑激素停止分泌，讓人盡快清醒。

According to the investigation, the heavy casualties happens when most of earthquake coming up in the late evening and people normally fall sleep and their reaction to the earthquake is retarded, therefore people do not have sufficient time to escape or to find the shelter. Our device bears advanced technology - an accelerator with electronic gyro applied and it can detect the wave prior to the occurrence of earthquake as long as the distance is 60km within the hypocenter. It helps people to gain the golden 8 seconds to timely find the shelter or to react properly. When the early warning function reacting to the earthquake initiates, the blue and white LED lighting up which will interfere the secretion to the melatonin in our brain which helps people to be conscious quickly.
