Thermostatic Shower Valves

The valve will prevent scalding when the child and senior citizen are in the shower.

Thermostatic Shower Valves

Flow handles

Temperature handles

The valve will prevent scalding when the child and senior citizen are in the shower.

ABOUT THERMONSTATIC SHOWER VALVES

This shower uses a wax thermostatic cartridge to maintain a constant shower temperature. The valve is anti-scald and will automatically shut down if the cold water supply fails. The independent controls allow for separate operation of the spray force and temperature. The safety temperature override button allows showering temperatures to reach a maximum of 38°C. To override this safety stop simply press the button and turn the temperature control knob. The shower elbows are supplied complete with filters and flow regulators.

Thermostatic Shower Valves

FEATURE

The valve is anti-scald and it will automatically shut down if the cold water fails.

DESCRIPTION

1/2" OR 3/4" Dual Control Thermostatic Valves.

Exposed Valve Or Concealed Valve.

Parts of this product can be changed upon customers' requests to meet the various demands.
