TRI - SPOT

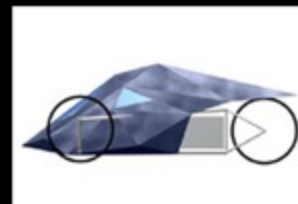

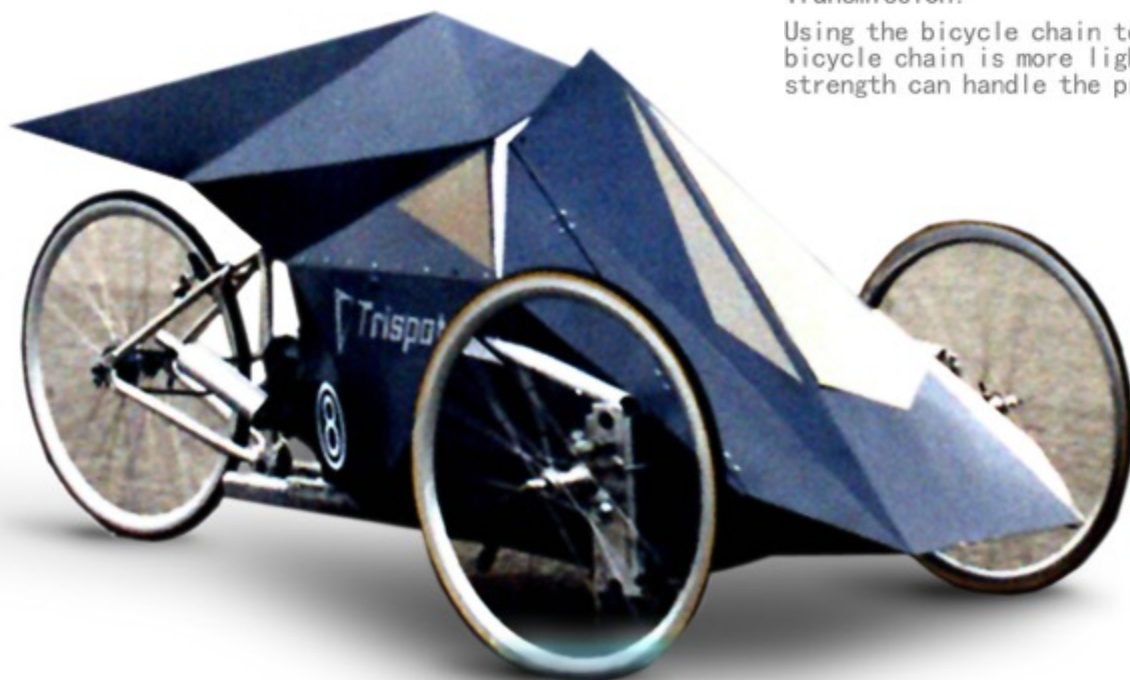

Design Brief /

Appearance:

Making use of the concept, stealth bomber, the shape of component make up by triangle which lower the resistance of wind force.

Transmission:

Using the bicycle chain to connect with engine and wheel, because the bicycle chain is more light, its good points save more fuel. Besides the strength can handle the process enough.

concept DC

Design Brief /

Combining the unpredictable shooting experience of LOMO camera, and make it less inconvenient when taking a digital camera, separate lens and LCD panel, you only need to bring lens when you go out, the size is smaller so you can hang it on your neck, or you can even take it as an accessory. All you need to do is just to push the bottom and you'll experience a whole new feeling of taking photos that LOMO brings you. On the other hand, when you put the lens and the panel together, it will function just as an regular one does. You will be able to view the photos anytime, which satisfies what exactly a customer needs.

INTERNATIONAL DESIGN COMPETITION

RE·MEMBER

- **Purpose:** Human beings consume too much paper just to leave messages. Hopefully, we can decrease the amount of paper waste using this product.
- **Idea :** To make use of the reflection appears when transparent table mat meets with the table surface, in order to design a non-pollution ECO bulletin board.

- **Feature:** You can put down in words with your finger without any paper or ink. Repeatedly tear down the paper, and you'll be able to re-use.

DESIGN BRIEF /

The whole concept is from the moonlight goes through the ancient windowsill, and "carved window" is the key of the design.

By using the good electric conduction of copper on low voltage LED lighting, the copper becomes more than a tool of conducting electricity - It makes the design more stylish.

Would like to present the image of ancient people staying up reading.

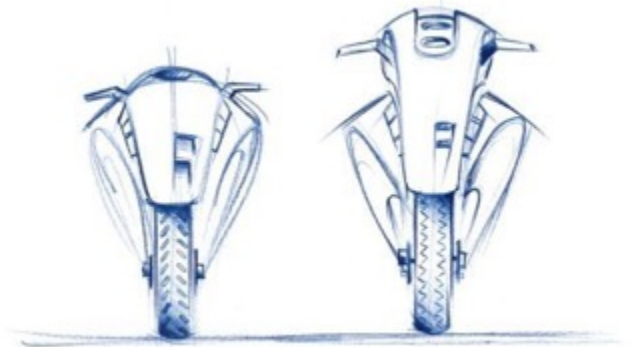

concept motorcycle

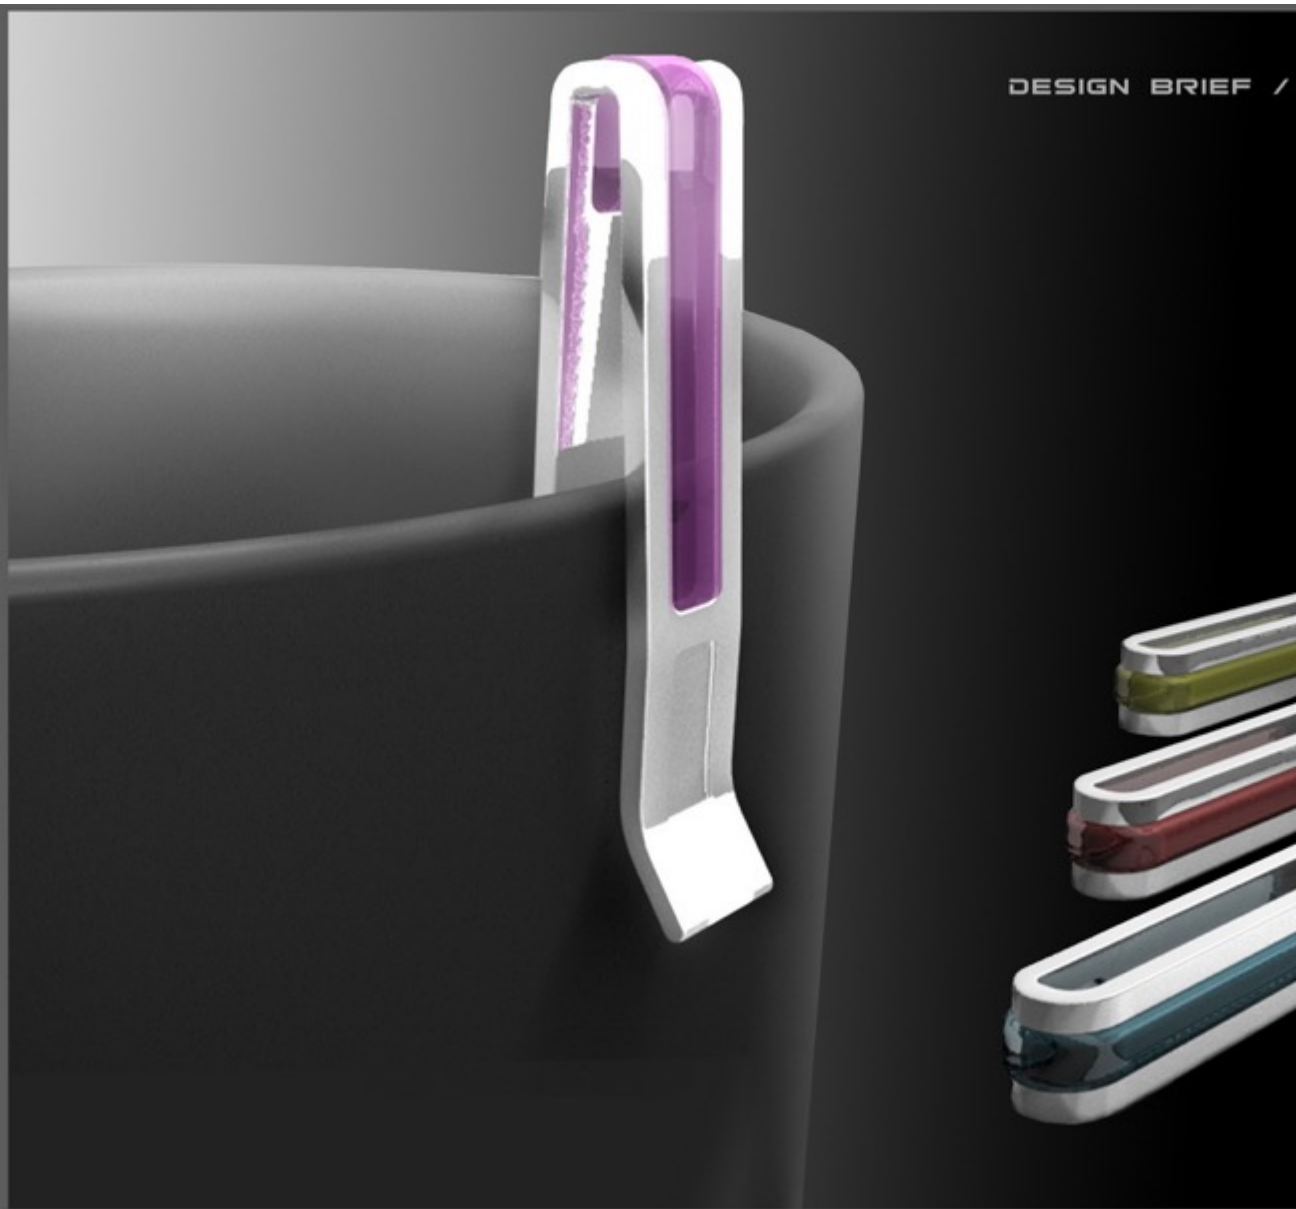

Design Brief /

“Schizophrenia” is the disassociation of personality which we often said. Its pathological character is that has several kind of different personalities in a person. But each kind of personality produces independently for being competent at some special items. When individual faces to a frightened matter, one of these personalities is out to handle this frightened state. By this concept as the direction, the creation take “scooter” as the structure combine the riding feeling like “sports bike” and “Harley”. Because these internal special characteristics, we call the motorcycle

“ The Third Schizor ”

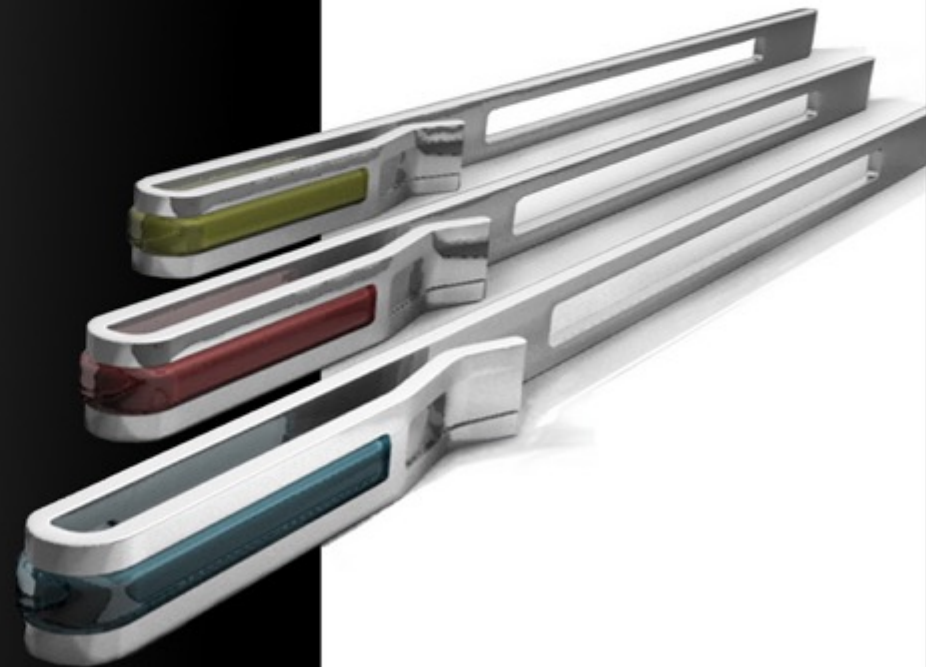

DESIGN BRIEF /

When using a traditional stirrer, it is unavoidable that the liquid remain on the stirrer, which will stain the table.

Why not clipping the stirrer on the interior with a pen cap to improve the situation? Also, we can mark different color on the cap to identify the owner of the stirrer.
