

William's Wisdom - The Back-Plane

(Assistants appear.)

AssistantA Tired of traffic jams during rush hours?

AssistantB Tired of getting lost when driving alone?

(The host appears.)

William Then, you will need the product I'll introduce later in the show.

First, welcome to "William's Wisdom". I'm William.

Today, I'll show you a wonderful product.

Due to the sharp increase of world population and traffic accidents, private and mass transportation are no longer running just on the ground.

Commuters can also fly in the sky!

This time, we've also hired the famous designer,

Louis Victor, whom you can call "LV", to design this product.

Let's welcome him.

Ladies and gentlemen, Louis Victor!

LV Hello everyone, I'm LV.

William So, LV, let's talk about the new product.

You really like the idea of it, right?

LV Yes, I fell in love with the idea soon after I saw the prototype of it.

William Wow! What interested you so much?

LV I often get lost, and I hate the traffic jams, too.

William I have the same problems! That's why I came up with the idea of Back-Plane. Back-Plane is a backpack that looks just like a normal backpack!

LV Don't underestimate it!

These two marvelous straps can hold over 200 kilograms, so you won't have to worry about falling when you are flying.

William There is another miraculous function of the backpack.

That is, any food you put into it can be kept fresh, hot and warm.

LV I've also invented some other equipment for it as well: the helmet.

And, I have been cooperated with F.F.F company to create this helmet.

The manager of F.F.F is also here now. Let's welcome her.

F.F.F Hi, everyone. I am the manager of the F.F.F.

I believe you all recognize my company and me.

If you don't, let me play a video to remind you.

(Assistants turn on the TV.)

(There is a man dancing.)

William Okay. I think no one can forget his dance. Let's focus on our helmet.

F.F.F There are hidden headphones and a mic in this helmet.

What's more, the cover of it can also be used as a head-up display.
On the screen, it shows you the condition of your Back-Plane.
It can also tell you information on your way.
Of course, it contains a GPS.

LV You will never get lost again!
Are you worried about safety when using it?
Don't be.
It is the safest product in the world.
It's not made of normal plastic.
It's made of a kind of light metal that is usually used to build bikes.

William If you see a real plane coming toward you, don't panic.
You will be fine.
Your Back-Plane is equipped with a collision-avoidance radar.

LV Now, we've invited the most "beautiful" lady, Rebecca,
to demonstrate how to use the Back-Plane.

(Rebecca comes in.)

Rebecca Yes, I AM the most beautiful lady!
The Back-Plane is easy to use.
All you have to do is to give it an order.
First, you just have to pack whatever you need into the Back-Plane
and put it on your back.

(As she says this, she puts it on her back.)

Rebecca Remember to fasten the belt between the two straps.
Put on this helmet... wait...
Do I really have to put it on?

William Yes, you do.
You need to demonstrate how it works!

Rebecca Then, you won't be able to see my beautiful face!
Never mind. I believe I will still be beautiful, even with a helmet.

LV Much more beautiful, I believe!

Rebecca Put on this helmet and say "Computer on."
You will see your current position on the screen.
Set your destination, then, you will see that a map appears.
Check if the computer has set the right place you want to go.
Then, just say "Fly", the Back-Plane will take you to where you want.

Rebecca I haven't charged this one yet, so, I think I won't fly away.
That means, I'll have to walk away with my beautiful face.
Bye~

LV Finally.

William Okay. Now, my assistants will tell you how and where to buy it.
AssistantA Because it is a new product, you can only buy it over the phone.
We will send it to your house after you transfer the money using an ATM.

AssistantB It is on sale now.
It retails at 250 thousand dollars.
Now, you only have to pay 200 thousand dollars to have it.
And, you can now buy two for just 380 thousand dollars.

AssistantA Now, call 0950311422 and ask for Cary to help you order it.

William Tired of walking to school or walk?
Tired of traffic jams during rush hours?
Tired of getting lost in the big city?
Then, you need our new product, Back-Plane.
It's very convenient. Besides, it's easy to use!
You haven't bought it yet?
Then, call now!

(Suddenly, Rebecca runs back.)

Rebecca What a wonderful product!
When I landed on the street, everyone stopped doing what they were busy at.
They looked at me surprisedly.
They gazed at me like I was not from earth.
They thought I was a goddess that came from heaven.
They were crazy about my beautiful appearance.

LV Oh my god! Why is she here again?
She makes me have a headache.

(Rebecca sings songs and is dancing happily.)

(LV sneaks across to Rebecca, putting the helmet on Rebecca's head.)

Rebecca What are you doing?

LV Shut up!
You look prettier with the helmet.

(Rebecca & LV start their fighting.)

William Assistants! Assistants!
Get these two people out of my show!

(Assistants take the two people out, but Rebecca hits one of the assistants and runs back.)

Rebecca William! I have things to say.

William No, you always talk about your appearance.

William "William's Wisdom" is a program that introduces useful products!

Rebecca No, I promise you.

I want to tell the audience how useful Back-Plane is!

William Well, then, I have no reason to refuse you now.

Rebecca Listen, everyone.
I just took a trip with the Back-Plane.
It's brilliant and it's definitely safe.
I almost forgot I was flying in the sky.
I thought I was sitting on a plane !

William Well, that's what we want, right?
So, buy one if you don't have it now !
Anything else?

Rebecca I think what I am going to say is something everyone knows.
I AM the most beautiful lady in the world.

William Okay ! Okay ! Now, you can GO !
It looks like the product is really a big hit !
Thanks for watching "William's Wisdom", and hope you like our show !
